

TEEN VAPING: What Parents Need to Know

**Tuesday, April 9th
6:00 PM**

Irvine High School Theater

Substance Abuse and Vaping

Irvine High School PTSA invites you to attend a presentation by Mr. Stephan Lambert, the Orange County Department of Education's Prevention Coordinator, on vaping and other issues regarding substance abuse. Jim Wright, the IHS School Resource Officer, will also be present to provide his perspective.

There is a growing concern about youth vaping, especially on school campuses. Newer, pod-based e-cigarettes are easy to conceal and contain high levels of nicotine, which can disrupt adolescent brain development.

Studies show that large numbers of our youth are using these substances. In this presentation, you will learn:

- What new electronic cigarettes look like
- What research says about the risks of youth vaping.
- How vaping devices are used with marijuana
- How to talk to your student about vaping
- What prevention resources are available for parents

Presentation is geared toward parents but students can be present.
